ENERGY POLICY

Index to Volume 24

January, February, March, April, May, June, July, August, September, October/November, December

Articles – titles

Coal

Community perceptions, environmental impacts, and energy policy. Rail shipment of coal *Jeffery K Lazo and Katherine T McClain* 24:6, 531–540

A cost minimization model for coal import strategy *Jeng-Wen Lai and Chia-Yon Chen* 24:12, 1111–1117

Electricity

Capital budgeting, technological innovation and the emerging competitive environment of the electric power industry *Shimon Awerbuch, Jesse Dillard, Tom Mouck and Alistair Preston* 24:2, 195–202

China's power management *Ming Yang and Xin Yu* 24:8, 735–757

The CO_2 mitigation options for the electric sector. A case study of Taiwan *Hsunling Bai and Jong-Hourm Wei* 24:3, 221–228

Compensation for the risk of stranded costs *A Lawrence Kolbe and Willian B Tye* 24:12, 1025–1050

Distributed generation. An alternative to electric utility investments in system capacity *Thomas E Hoff, Howard J Wenger and Brian K Farmer* 24:2, 137–147

Economic organization and liberalization of the electricity industry. In search of conceptualization *Maarten J Arentsen and Rolf W Künneke* 24:6, 541–552

Electricity liberalization policies in Norway and Sweden. Political trade offs under cognitive limitations *Atle Midttun* 24:1, 53–65

Electricity privatization revisited. A commentary on the case for new initiatives in India *V Ranganathan* 24:9, 821–825

The evolution of the cogeneration market in Texas *Jay Zarnikau and Bob Reilley* 24:1, 67–79

The future of DSM in a restructured US electricity industry *Eric Hirst, Ralph Cavanagh and Peter Miller* 24:4, 303–315

Integrated resource planning and environmental pricing in a competitive and deregulated electricity market *Jon Iver Bakken and Nigel Lucas* 24:3, 239–244

Integrating financial theory and methods in electricity resource planning *Frank A Felder* 24:2, 149–154

The lifetime pollution implications of various types of electricity generation. An input–output analysis *John L R Proops, Philip W Gay, Stefan Speck and Thomas Schröder* 24:3, 229–237

Market instruments and the control of acid rain damage. Effects of a sulphur tax on the Spanish electricity generating industry *Xavier Labandeira-Villot* 24:9, 841–854

Monte Carlo simulation techniques and electric utility resource decisions *Peter J Spinney and G Campbell Watkins* 24:2, 155–163

Negawatts. Twelve transitions, eight improvements and one distraction *Amory B Lovins* 24:4, 331–343

Opening up and transition, success and problems. Financing and reforms of the electric power sector in Latin America and the Caribbean *Paul H Suding* 24:5, 437–445

The power industry in Korea. The business environment for the participation of the private sector *Sung-Bong Cho* 24:5, 471–475

Structural changes in the power sector in Asia. Improving profitability *Sheila Patawaran Ingco* 24:8, 723–733

Then and now. The perspective of the man who coined the term 'DSM' *Clark W Gellings* 24:4, 285–288

Valuing the flexibility of alternative sources of power generation *Chris Chapman and Stephen Ward* 24:2, 129–136

Energy and the environment

A critique of estimates of the cost of damage to building materials due to atmospheric attack *Ken Gregory, Simon Durk and James Gamble* 24:7, 641–649

A free lunch at higher CAFE? A review of economic environmental and social benefits *Hadi Dowlatabadi, Lester B Lave and Armistead G Russell* 24:3, 253–264

A multinational model for CO_2 reduction. Defining boundaries of future CO_2 emissions in nine countries *Tom Kram and Douglas Hill* 24:1, 39–51

Air pollution and green accounts *Kirk Hamilton and Giles Atkinson* 24:7, 675–684

Assessing long-term impacts of increased crop productivity on atmospheric CO_2 *James Cavazzoni and Tyler Volk* 24:5, 403–411

The benefits of reduced damage to buildings from abatement of sulphur dioxide emissions *Helen M ApSimon and David Cowell* 24:7, 651–654

The challenge of sustainability. Balancing China's energy, economic and environmental goals *John Byrne, Bo Shen and Xiuguo Li* 24:5, 455–462

Climate change costs. Recent advancements in the economic assessment *Samuel Fankhauser and Richard S J Tol* 24:7, 665–673

Climate change mitigation. A review of cost estimates and methodologies for the post-planned economies *William U Chandler, Meredydd Evans and Alexander Kolesov* 24:10/11, 927–935

CO_2 emissions from passenger transport. A comparison of international trends from 1973 to 1992 *Lynn Scholl, Lee Schipper and Nancy Kiang* 24:1, 17–30

The CO_2 mitigation options for the electric sector. A case study of Taiwan *Hsunling Bai and Jong-Hourm Wei* 24:3, 221–228

Community perceptions, environmental impacts, and energy policy. Rail shipment of coal *Jeffery K Lazo and Katherine T McClain* 24:6, 531–540

The costs of CO_2 emissions reductions. Some insights from global analyses *Richard Richels and Peter Sturm* 24:10/11, 875–887

The costs of mitigating carbon emissions. A review of methods and findings from European studies *Florentin Krause* 24:10/11, 899–915

Costs of reducing greenhouse gas emissions in the USA and Canada *Mark Jaccard and W David Montgomery* 24:10/11, 889–898

The dose–response function approach to modelling the health effects of air pollution *Edward Calthrop and David Maddison* 24:7, 599–607

The economics of climate change mitigation in developing countries *Kirsten Halsnæs* 24:10/11, 917–926

Economic valuation and health damage from air pollution in the developing world *David Pearce* 24:7, 627–630

Estimates of damage to forests in Europe due to emissions of acidifying pollutants *K Gregory, C Webster and S Durk* 24:7, 655–664

Estimating the mortality costs of lead emissions in England and Wales *W R Dubourg* 24:7, 621–625

Fair sharing of greenhouse gas burdens *Mark A Ridgley* 24:6, 517–529
GHG mitigation in the transport sector *Laurie Michaelis and Ogunlade Davidson* 24:10/11, 969–984
Global warming and developing countries. The possibility of a solution by accelerating development *Yasuhiro Murota and Kokichi Ito* 24:12, 1061–1077
Industrial emissions of greenhouse gases *William R Moomaw* 24:10/11, 951–968
Integrated resource planning and environmental pricing in a competitive and deregulated electricity market *Jon Iver Bakken and Nigel Lucas* 24:3, 239–244
The lifetime pollution implications of various types of electricity generation. An input–output analysis *John L R Proops, Philip W Gay, Stefan Speck and Thomas Schröder* 24:3, 229–237
Market instruments and the control of acid rain damage. Effects of a sulphur tax on the Spanish electricity generating industry *Xavier Labandeira-Villot* 24:9, 841–854
Mitigating factors. Assessing the costs of reducing GHG emissions *Jean-Charles Hourcade and John Robinson* 24:10/11, 863–873
Mitigation options for carbon dioxide emissions from buildings. A global analysis *Mark D Levine, Lynn Price and Nathan Martin* 24:10/11, 937–949
A multinational model for CO_2 reduction. Refining boundaries of future CO_2 emissions in nine countries *Tom Kram and Douglas Hill* 24:1, 39–51
Options for reducing CO_2 emissions from the energy supply sector *T B Johansson, R H Williams, H Ishitani and James A Edmonds* 24:10/11, 985–1003
PAGE95. An updated valuation of the impacts of global warming *Erica L Plambeck and Chris Hope* 24:9, 783–793
Particulate matter and human health in the United Kingdom *David Pearce and Tom Crowards* 24:7, 609–619
Population growth and global CO_2 emissions. A secular perspective *Tom Knapp and Rajen Mookerjee* 24:1, 31–37
Prospects for the joint implementation of sulphur emission reductions in Europe *Peter D Bailey, Clair A Gough, Katrin Millock and Michael J Chadwick* 24:6, 507–516
Reducing energy related emissions. Using an energy systems optimization model to support policy planning in Finland *A Lehtilä and P Pirilä* 24:9, 805–819
Restructuring the East German energy system *Ulf Hansen* 24:6, 553–562
Solar power and climate change policy in developing countries *Thomas E Drennen, Jon D Erickson and Duane Chapman* 24:1, 9–16
Sustainable energy for tomorrow's world. The case for an optimistic view of the future *Nicholas Lenssen and Christopher Flavin* 24:9, 769–781
Transboundary air pollution in Europe *Helen M ApSimon and Rachel F Warren* 24:7, 631–640
The US market for SO_2 permits. Policy implications of the low price and trading volume *Klaus Conrad and Robert E Kohn* 24:12, 1051–1059
Valuing the impact of CO_2 emissions *Chris Hope and Philip Maul* 24:3, 211–219

Energy conservation and efficiency

CO_2 emissions from passenger transport. A comparison of international trends from 1973 to 1992 *Lynn Scholl, Lee Schipper and Nancy Kiang* 24:1, 17–30
Diffusion of improved biomass stoves in China *Daxiong Qiu, Shuhua Gu, Peter Catania and Kun Huang* 24:5, 463–469
The economics of energy conservation policy *Ronald J Sutherland* 24:4, 361–370
Efficiency improvements in US office equipment. Expected policy impacts and uncertainties *Jonathan G Koomey, MaryAnn Piette, Michael Cramer and Joseph H Eto* 24:12, 1101–1110
Energy conservation in the Russian manufacturing industry. Potentials and obstacles *J W Fromme* 24:3, 245–252
A free lunch at higher CAFE? A review of economic environmental and social benefits *Hadi Dowlatabadi, Lester B Lave and Armistead G Russell* 24:3, 253–264
Negawatts. Twelve transitions, eight improvements and one distraction *Amory B Lovins* 24:4, 331–343
What is energy efficiency? Concepts, indicators and methodological issues *Murray G Patterson* 24:5, 377–390

Energy modelling

The costs of CO_2 emissions reductions. Some insights from global analyses *Richard Richels and Peter Sturm* 24:10/11, 875–887
The dose–response function approach to modelling the health effects of air pollution *Edward Calthrop and David Maddison* 24:7, 599–607
Global warming and developing countries. The possibility of a solution by accelerating development *Yasuhiro Murota and Kokichi Ito* 24:12, 1061–1077
Monte Carlo simulation techniques and electric utility resource decisions *Peter J Spinney and G Campbell Watkins* 24:2, 155–163
A multinational model for CO_2 reduction. Defining boundaries of future CO_2 emissions in nine countries *Tom Kram and Douglas Hill* 24:1, 39–51
PAGE95. An updated valuation of the impacts of global warming *Erica L Plambeck and Chris Hope* 24:9, 783–793
Particulate matter and human health in the United Kingdom *David Pearce and Tom Crowards* 24:7, 609–619
Population growth and global CO_2 emissions. A secular perspective *Tom Knapp and Rajen Mookerjee* 24:1, 31–37
Reducing energy related emissions. Using an energy systems optimization model to support policy planning in Finland *A Lehtilä and P Pirilä* 24:9, 805–819

Energy policy and analysis

Community perceptions, environmental impacts, and energy policy. Rail shipment of coal *Jeffery K Lazo and Katherine T McClain* 24:6, 531–540
Dutch wind power policy. Stagnating implementation of renewables *Maarten Wolsink* 24:12, 1079–1088
Economic organization and liberalization of the electricity industry. In search of conceptualization *Maarten J Arentsen and Rolf W Künneke* 24:6, 541–552
Energy, economic growth and causality in developing countries. A case study of Tanzania and Nigeria *Obas John Ebohon* 24:5, 447–453
Energy reform in Mexico. A new development model or modernization of statism? *Victor Rodriguez-Padilla and Rosio Vargas* 24:3, 265–274
The energy sector in southern Africa. A preliminary survey of post-apartheid challenges *Ewah Otu Eleri* 24:1, 113–123
Mitigating factors. Assessing the costs of reducing GHG emissions *Jean-Charles Hourcade and John Robinson* 24:10/11, 863–873
The production tax credit for wind turbine powerplants is an ineffective incentive *Edward Kahn* 24:5, 427–435
Restructuring the East German energy system *Ulf Hansen* 24:6, 553–562
The US market for SO_2 permits. Policy implications of the low price and trading volume *Klaus Conrad and Robert E Kohn* 24:12, 1051–1059

Energy security and world trade

Globalization of world economy *M A Adelman* 24:12, 1021–1024

Energy supply and demand

Analysis of household energy demand in Vietnam *Nguyen Anh Tuan and Thierry Lefevre* 24:12, 1089–1099
DSM progress and lessons in the global context *Stewart Boyle* 24:4, 345–359
Evaluating the economics of photovoltaics in a demand-side management role *John Byrne, Steven Letendre, Chandrasekhar Govindarajalu, Young-Doo Wang and Ralph Nigro* 24:2, 177–185
Forecast and analysis of demand for petroleum products in India *Raghavendra D Rao and Jyoti K Parikh* 24:6, 583–592
The future of DSM in a restructured US electricity industry *Eric Hirst, Ralph Cavanagh and Peter Miller* 24:4, 303–315
How much DSM is really there? A market perspective *John H Chamberlin and Patricia M Herman* 24:4, 323–330
Informing decision makers and identifying niche opportunities for windpower. Use of multiattribute trade off analysis to evaluate non-dispatchable resources *Stephen R Connors* 24:2, 165–176
Oil prices. The start of an era? *Paul Stevens* 24:5, 391–402
Options for reducing CO_2 emissions from the energy supply sector *T B Johansson, R H Williams, H Ishitani and James A Edmonds* 24:10/11, 985–1003
Then and now. The perspective of the man who coined the term 'DSM' *Clark W Gellings* 24:4, 285–288
Utility DSM. What have we learned? Where are we going? *Steven Nadel and Howard Geller* 24:4, 289–302
What roles for utility sponsored DSM in a competitive environment? *Kenneth M Keating* 24:4, 317–321

Energy technology

Costs of reducing greenhouse gas emissions in the USA and Canada *Mark Jaccard and W David Montgomery* 24:10/11, 889–898
The European Energy Charter Treaty. Reality or illusion? *Regina S Axerod* 24:6, 497–505
GHG mitigation in the transport sector *Laurie Michaelis and Ogunlade Davidson* 24:10/11, 969–984
Industrial emissions of greenhouse gases *William R Moomaw* 24:10/11, 951–968

Options for reducing CO_2 emissions from the energy supply sector *T B Johansson, R H Williams, H Ishitani and James A Edmonds* 24:10/11, 985–1003
The production tax credit for wind turbine powerplants is an ineffective incentive *Edward Kahn* 24:5, 427–435
Transition to alternative energy supply technologies. The case of windpower *Penny Street and Ian Miles* 24:5, 413–425
What is energy efficiency? Concepts, indicators and methodological issues *Murray G Patterson* 24:5, 377–390

LDCs
The economics of climate change mitigation in developing countries *Kirsten Halsnæs* 24:10/11, 917–926
Economic valuation and health damage from air pollution in the developing world *David Pearce* 24:7, 627–630
Energy, economic growth and causality in developing countries. A case study of Tanzania and Nigeria *Obas John Ebohon* 24:5, 447–453
Global warming and developing countries. The possibility of a solution by accelerating development *Yasuhiro Murota and Kokichi Ito* 24:12, 1061–1077
Solar power and climate change policy in developing countries *Thomas E Drennen, Jon D Erickson and Duane Chapman* 24:1, 9–16

National and regional energy profiles and government policy
Analysis of household energy demand in Vietnam *Nguyen Anh Tuan and Thierry Lefevre* 24:12, 1089–1099
The challenge of sustainability. Balancing China's energy, economic and environmental goals *John Byrne, Bo Shen and Xiuguo Li* 24:5, 455–462
China's power management *Ming Yang and Xin Yu* 24:8, 735–757
Climate change mitigation. A review of cost estimates and methodologies for the post-planned economies *William U Chandler, Meredydd Evans and Alexander Kolesov* 24:10/11, 927–935
The CO_2 mitigation options for the electric sector. A case study of Taiwan *Hsunling Bai and Jong-Hourm Wei* 24:3, 221–228
The costs of mitigating carbon emissions. A review of methods and findings from European studies *Florentin Krause* 24:10/11, 899–915
Costs of reducing greenhouse gas emissions in the USA and Canada *Mark Jaccard and W David Montgomery* 24:10/11, 889–898
A cross-cultural analysis of household energy use behaviour in Japan and Norway *Harold Wilhite, Hidetoshi Nakagami, Takashi Masuda, Yukiko Yamaga and Hiroshi Haneda* 24:9, 795–803
Current limitations on further introduction of renewable energy systems in the South Pacific. Five national case studies *Xiaojiang Yu, Alistair Gilmour and Ros Taplin* 24:8, 697–711
Current limitations on further introduction of renewable energy systems in the South Pacific. Five national case studies *Xiaojiang Yu, Alistair Gilmour and Ros Taplin* 24:8, 697–711
Development of renewable energy resources in Greece. Policy initiatives and systemic constraints *Constantine Hadjilambrinos* 24:6, 563–573
Diffusion of improved biomass stoves in China *Daxiong Qiu, Shuhua Gu, Peter Catania and Kun Huang* 24:5, 463–469
Efficiency improvements in US office equipment. Expected policy impacts and uncertainties *Jonathan G Koomey, MaryAnn Piette, Michael Cramer and Joseph H Eto* 24:12, 1101–1110
Electricity liberalization policies in Norway and Sweden. Political trade offs under cognitive limitations *Atle Midttun* 24:1, 53–65
Electricity privatization revisited. A commentary on the case for new initiatives in India *V Ranganathan* 24:9, 821–825
Energy conservation in the Russian manufacturing industry. Potentials and obstacles *J W Fromme* 24:3, 245–252
Energy, economic growth and causality in developing countries. A case study of Tanzania and Nigeria *Obas John Ebohon* 24:5, 447–453
Energy reform in Mexico. A new development model or modernization of statism? *Victor Rodriguez-Padilla and Rosio Vargas* 24:3, 265–274
The energy sector in southern Africa. A preliminary survey of post-apartheid challenges *Ewah Otu Eleri* 24:1, 113–123
The European Energy Charter Treaty. Reality or illusion? *Regina S Axerod* 24:6, 497–505
Fair sharing of greenhouse gas burdens *Mark A Ridgley* 24:6, 517–529
Forecast and analysis of demand for petroleum products in India *Raghavendra D Rao and Jyoti K Parikh* 24:6, 583–592
Indian scenario of renewable energy for sustainable development *B S K Naidu* 24:6, 575–581
Market instruments and the control of acid rain damage. Effects of a sulphur tax on the Spanish electricity generating industry *Xavier Labandeira-Villot* 24:9, 841–854
Nigeria. The Liquefied Natural Gas Project *Sola Adepetun and Kemi Segun* 24:6, 593–596
Opening up and transition, success and problems. Financing and reforms of the electric power sector in Latin America and the Caribbean *Paul H Suding* 24:5, 437–445
Pakistan's new petroleum policy 1994. An immense promise *Salman Saif Ghouri* 24:5, 477–488
The power industry in Korea. The business environment for the participation of the private sector *Sung-Bong Cho* 24:5, 471–475
Prospects for the joint implementation of sulphur emission reductions in Europe *Peter D Bailey, Clair A Gough, Katrin Millock and Michael J Chadwick* 24:6, 507–516
The quiet (energy) revolution. Analysing the dissemination of photovoltaic power systems in Kenya *Richard H Acker and Daniel M Kammen* 24:1, 81–111
Real rural residential energy consumption in China, 1990 *J W Sun* 24:9, 827–839
Reducing energy related emissions. Using an energy systems optimization model to support policy planning in Finland *A Lehtilä and P Pirilä* 24:9, 805–819
Restructuring the Hong Kong gas industry *Pun-Lee Lam* 24:8, 713–722
Restructuring the East German energy system *Ulf Hansen* 24:6, 553–562
Structural changes in the power sector in Asia. Improving profitability *Sheila Patawaran Ingco* 24:8, 723–733
Transboundary air pollution in Europe *Helen M ApSimon and Rachel F Warren* 24:7, 631–640

Nuclear power
Risk communication. The Barsebäck nuclear plant case *Ragnar E Löfstedt* 24:8, 689–696

Oil and gas
Forecast and analysis of demand for petroleum products in India *Raghavendra D Rao and Jyoti K Parikh* 24:6, 583–592
Nigeria. The Liquefied Natural Gas Project *Sola Adepetun and Kemi Segun* 24:6, 593–596
Restructuring the Hong Kong gas industry *Pun-Lee Lam* 24:8, 713–722
Oil prices. The start of an era? *Paul Stevens* 24:5, 391–402
Pakistan's new petroleum policy 1994. An immense promise *Salman Saif Ghouri* 24:5, 477–488

Renewables
Current limitations on further introduction of renewable energy systems in the South Pacific. Five national case studies *Xiaojiang Yu, Alistair Gilmour and Ros Taplin* 24:8, 697–711
Development of renewable energy resources in Greece. Policy initiatives and systemic constraints *Constantine Hadjilambrinos* 24:6, 563–573
Dutch wind power policy. Stagnating implementation of renewables *Maarten Wolsink* 24:12, 1079–1088
Evaluating the economics of photovoltaics in a demand-side management role *John Byrne, Steven Letendre, Chandrasekhar Govindarajalu, Young-Doo Wang and Ralph Nigro* 24:2, 177–185
Informing decision makers and identifying niche opportunities for windpower. Use of multiattribute trade off analysis to evaluate non-dispatchable resources *Stephen R Connors* 24:2, 165–176
Indian scenario of renewable energy for sustainable development *B S K Naidu* 24:6, 575–581
A marketing orientation is the key to a sustainable energy future *Gary L Nakarado* 24:2, 187–193
The production tax credit for wind turbine powerplants is an ineffective incentive *Edward Kahn* 24:5, 427–435
The quiet (energy) revolution. Analysing the dissemination of photovoltaic power systems in Kenya *Richard H Acker and Daniel M Kammen* 24:1, 81–111
Solar power and climate change policy in developing countries *Thomas E Drennen, Jon D Erickson and Duane Chapman* 24:1, 9–16
Sustainable energy for tomorrow's world. The case for an optimistic view of the future *Nicholas Lenssen and Christopher Flavin* 24:9, 769–781
Transition to alternative energy supply technologies. The case of windpower *Penny Street and Ian Miles* 24:5, 413–425
Valuing the flexibility of alternative sources of power generation *Chris Chapman and Stephen Ward* 24:2, 129–136

The role of utilities
Capital budgeting, technological innovation and the emerging competitive environment of the electric power industry *Shimon Awerbuch, Jesse Dillard, Tom Mouck and Alistair Preston* 24:2, 195–202
Compensation for the risk of stranded costs *A Lawrence Kolbe and Willian B Tye* 24:12, 1025–1050

Distributed generation. An alternative to electric utility investments in system capacity *Thomas E Hoff, Howard J Wenger and Brian K Farmer* 24:2, 137–147

The evolution of the cogeneration market in Texas *Jay Zarnikau and Bob Reilley* 24:1, 67–79

How much DSM is really there? A market perspective *John H Chamberlin and Patricia M Herman* 24:4, 323–330

Integrating financial theory and methods in electricity resource planning *Frank A Felder* 24:2, 149–154

Monte Carlo simulation techniques and electric utility resource decisions *Peter J Spinney and G Campbell Watkins* 24:2, 155–163

Then and now. The perspective of the man who coined the term 'DSM' *Clark W Gellings* 24:4, 285–288

Utility DSM. What have we learned? Where are we going? *Steven Nadel and Howard Geller* 24:4, 289–302

What roles for utility sponsored DSM in a competitive environment? *Kenneth M Keating* 24:4, 317–321
